

Nonrenewable Energy Assignment

25 points for each energy source

Directions:

- ✓ Provide information for each of the nonrenewable energy types.
- ✓ You can create a concept map, poster or brochure.
- ✓ Must be HANDWRITTEN with your name on the top of the paper.

- Coal
- Oil
- Natural Gas
- Nuclear

Information needed for each type of energy source:

- A specific definition
- Draw 2 pictures that illustrate:
 - 1 advantage & 1 disadvantage for the energy
- List 3 specific negative environmental impacts for each
- List 2 unique and detailed advantages for each
- List 3 specific uses for each type of energy source

Example of graphic organizer

Be creative in how you present your information! Neatness counts!
(My example is not neat!) 😞
